WORK EXPERIENCE

Data Engineer Intern

January 2025 - Present

Local Grown Salads

- Establishing RESTful API endpoints using **FastAPI** for ingestion and management of IoT device state and telemetry data storing results in a **PostgreSQL** database on **AWS**; deploying **Docker** containers for cross-system consistency and scalability.

Data Engineer Intern

June 2024 - December 2024

Axyo (Synapse Labs Inc.)

- Created a scalable ETL pipeline reducing manual processing by 70% using **S3, AWS Lambda and Astro Airflow** for real time reconciliation of payment; Indexed processed data in **DynamoDB** for fast retrieval and historical tracking.
- Built data visualizations using **QuickSight** dashboards and **KPIs**; **Documented and codified project** with process **flowchart and ER - architecture**. Improving **10% revenue impact** by developing collaboration with product and engineering teams.
- Implemented prescriptive data modeling techniques using **Decision Trees and Random Forest**; Increased classification accuracy from 60% to 80% via transfer learning, **boosting matching reliability by 20%**.
- Improved data reliability by 25%** through rigorous data quality checks, implementation of validation rules, and proactive pipeline monitoring using **custom CloudWatch alerts**.

Deep Learning Research Aide

July 2023 - June 2024

ASU College of Health Solutions, JIliang Lab

- Implemented regression, segmentation, and localization models for 2D chest X-ray analysis using **Deep Neural Networks, CNNs, and Transformers** in PyTorch, collaborating with Valleywise Health to improve accuracy and efficiency.
- Fine-tuned **NLP models (GPT-4, CLIP, RAM++)** on electronic healthcare reports using **Qdrant - Vector Database** for query classification, boosting performance by **5%**, and presented model benchmarks with **Power BI** dashboards.

Software Developer - AI/ML

January 2021 - December 2022

HIB

- Initiated and led an OCR-based pipeline using **PyTesseract** to digitize 150,000 handwritten bills, minimized manual data entry time by **40%**; utilized **Python, SQL, and Pandas** for data preprocessing, entity resolution, and key-value extraction.
- Applied **XGBoost and Random Forest** models to identify daily product trends, refining pricing strategies and generating weekly reports for business recommendation, achieved **15% revenue growth** and a **10% increase in customer experience**.
- Programmed a customer segmentation model using **K-Means clustering**, identifying high-value customer groups and amplifying marketing campaigns, leading to a **7% increase in repeat purchases** and improved campaign ROI.
- Designed **Tableau** interactive dashboards to track and visualize sales trends, reducing **weekly analysis time by 10%**.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, JavaScript, D3.js.

Frameworks & Libraries: PyTorch, Kubernetes, SciPy, PySpark, Scikit-Learn, OpenCV, NumPy, Pandas, Matplotlib, Apache Spark, Airflow, FastAPI, NLTK, AWS Redshift.

Data Tools/Platforms: Tableau, MLflow, Jenkins, AWS QuickSight, MySQL, SageMaker, Excel, PowerPoint, Visual Studio Code, Git, Docker, Google Cloud Run, BigQuery, Vertex AI, Cloud Storage, Pub/Sub, MongoDB, Databricks, Looker.

PROJECTS

Anime Recommendation System | *Flask, Docker, Kubernetes, DVC, Jenkins, GCP.*

Present

- Built an AI-powered hybrid recommendation achieving **89% Top-N** accuracy on test data; deployed a scalable **Flask web app** with CI/CD pipeline, containerized deployment via **Docker, Kubernetes** and data versioning with **DVC** on **GCP**.

AI Hotel Reservation System | *LightGBM, MLflow, Jenkins, GCP, Data analysis, Machine Learning.*

Present

- Integrated a prediction system with **5% improved accuracy** using **LightGBM, MLflow** for tracking, **Jenkins for CI/CD** automation, and deployed on **Google Cloud Run** for efficient and scalable inference for customer satisfaction forecasting.

Integration of RAG with Open Source LLM and LangChain | *RAG, NLP, Qdrant, LangChain*

Present

- Enhanced source accuracy by 2% using **Qdrant, BGE-large-en-v1** embeddings, and **LangChain with LLM (BERT)** in an optimized pipeline for seamless **text generation in Q&A and research summaries**.

EDUCATION

Arizona State University

Tempe, AZ

Master of Science in Robotics and Autonomous Systems - Artificial Intelligence

December 2024

Dayananda Sagar University

Bengaluru, India

Bachelor of Technology in Computer Science and Engineering

May 2020
