

Anirudh Iyengar Kaniyar Narayana Iyengar

akaniyar@asu.edu | 480-919-4286 | www.linkedin.com/in/anirudhiyengar-kn | [Portfolio](#) | [Github](#)

First-generation graduate with about 4 years of industrial experience in data science & AI development.

WORK EXPERIENCE

Backend Engineer - ML Infrastructure Intern

January 2025 - Present

Local Grown Salads

- Establishing API endpoints using **FastAPI development** for IoT device state and sensor data management in a **PostgreSQL** database on **AWS** and deploying **Docker** containers for cross-system consistency and scalability.

Data Science Intern

June 2024 - December 2024

Axyo (Synapse Labs Inc.)

- Created an end-to-end **ETL pipeline** for automated payment reconciliation, decreased manual time by 70%; Leveraged **Amazon Textract** for OCR to extract and convert unstructured data into structured JSON formats.
- Implemented prescriptive data modeling techniques using **Decision Trees and Random Forest**; Increased classification accuracy from 60% to 80% via transfer learning, boosting matching reliability by 20%.
- Built data visualizations using **QuickSight** dashboards and **KPIs**; **Documented and codified project** with process **flowchart** and **ER - architecture**. Improving 10% revenue impact by developing collaboration with internal clients and team.
- Developed real-time data pipelines and orchestration via **AWS, Docker, Kubernetes, Terraform** and indexed processed data in **DynamoDB** for fast retrieval and historical tracking.

Deep Learning Research Aide

July 2023 - June 2024

ASU College of Health Solutions, JLiag Lab

- Implemented regression, segmentation, and localization models for 2D chest X-ray analysis using **Deep Neural Networks, CNNs, and Transformers** in PyTorch, collaborating with Valleywise Health to improve accuracy and efficiency.
- Fine-tuned **NLP models (GPT-4, CLIP, RAM++)** on electronic healthcare reports using **Qdrant - Vector Database** for query classification, boosting performance by 5%, and presented model benchmarks with **Power BI** dashboards.

Data Scientist

January 2021 - December 2022

HIB

- Initiated and led an OCR-based pipeline using **PyTesseract** to digitize 150,000 handwritten bills, minimized manual data entry time by 40%; utilized **Python, SQL, and Pandas** for data preprocessing, entity resolution, and key-value extraction.
- Applied **XGBoost and Random Forest** models to identify daily product trends, refining pricing strategies and generating weekly reports for business recommendation, achieved **15% revenue growth** and a **10% increase in customer experience**.
- Programmed a customer segmentation model using **K-Means clustering**, identifying high-value customer groups and amplifying marketing campaigns, leading to a **7% increase in repeat purchases** and improved campaign ROI.
- Designed **Tableau** interactive dashboards to track and visualize sales trends, reducing **weekly analysis time by 10%**.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, HTML, MATLAB, Bash, R, CSS, JavaScript, D3.js, TypeScript.

Frameworks: PyTorch, Kubernetes, SciPy, PySpark, Scikit-Learn, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, TensorFlow, Huggingface, Transformers, Jupyter, Detectron2, OpenAI API, Apache Spark, Airflow, FastAPI.

Tools/Platforms: Tableau, MLFlow, NLTK, Jenkins, AWS QuickSight, MySQL, SageMaker, Excel, PowerPoint, Visual Studio Code, Git, Docker, CI/CD Pipelines, Google Cloud Run, BigQuery, Vertex AI, Cloud Storage, Pub/Sub, MongoDB, Databricks.

PROJECTS

AI Hotel Reservation System | *LightGBM, MLflow, Jenkins, GCP, Data analysis, Machine Learning.*

Present

- Integrated a prediction system with **5% improved accuracy** using **LightGBM, MLflow** for tracking, **Jenkins for CI/CD** automation, and deployed on **Google Cloud Run** for efficient and scalable inference for customer satisfaction forecasting.

Integration of RAG with Open Source LLM and LangChain | *RAG, NLP, Qdrant, LangChain*

Present

- Enhanced source accuracy by 2% using **Qdrant, BGE-large-en-v1** embeddings, and **LangChain with LLM (BERT)** in an optimized pipeline for seamless **text generation in Q&A and research summaries**.

Mapping Accident Trends and Patterns in Maryland | *D3.js, Javascript, HTML5, CSS3/SCSS*

December 2024

- Developed visualizations like **Car-in-a-Clock, Tree Map and Geo-Spatial Mapping** for The PacificVis Storytelling Contest.

EDUCATION

Arizona State University

Master of Science in Robotics and Autonomous Systems - Artificial Intelligence

Tempe, AZ

December 2024

Dayananda Sagar University

Bachelor of Technology in Computer Science and Engineering

Bengaluru, India

May 2020
